**ADT AND LIFE|WARE TEAM UP TO PROVIDE HOMEOWNERS WITH  
INTEGRATED HOME SECURITY AND HOME AUTOMATION**

*Systems will Work Together to Provide Total Home and Living Solutions*

**BOCA RATON, Fla.** – Sept. 6, 2007 – ADT Security Services, a unit of Tyco International, today announced it will team up with Life|ware™ digital entertainment and home automation solutions to integrate ADT home security systems into the Life|ware digital home platform. Using a simple menu on a video or television monitor, homeowners will now be able to not only control home entertainment, lighting and temperature, but also their ADT security systems at home or from a secure web enabled connection.

Life|ware is a digital home control system that allows homeowners to control a variety of subsystems including lighting, DVRs, thermostats, music and digital photo slide shows from a video or television monitor. Through this agreement, ADT's Custom Home Services can be integrated into the Life|ware digital platform. Life|ware and ADT will jointly market their products to new and existing customers.

Earlier this year ADT announced its Custom Home Gold Service platform aimed at providing affluent homeowners with one-on-one, customized security and automation products and services to meet the demands of their lifestyle and home environment.

Homeowners are looking for more services and at the same time they want ease of use, according to Tim McKinney, director of ADT's Custom Home Services.

“Life|ware is an innovative product that makes it easy for homeowners to control their environment and entertainment needs from one platform. It makes sense to include security and safety functions in the package,” he said.

As part of the new agreement between ADT and Life|ware, the companies will co-market their products to existing and new customers, builders and developers.

“The opportunity to team up with ADT is exciting for numerous reasons,” said Steve Cashman, vice president of sales for Life|ware. “ADT is the premier provider of security systems in the U.S. and has helped make home protection a reality for almost every market segment in the country. Working with ADT to help increase awareness and deployment of Life|ware to its customers is going to have a major impact on how consumers use their security systems.”

ADT-monitored homes using the Life|ware service will include ADT branded security features, and can be controlled from any Life|ware enabled screen.

### **About Exceptional Innovation**

Based in the Westerville suburb of Columbus, Ohio, Exceptional Innovation produces Life|ware™ home control software and hardware for digital living. Life|ware creates a lifestyle experience that allows consumers to enjoy their digital entertainment, wherever and whenever they want, as well as manage their lighting, multi-room audio, HVAC, security, appliances and other subsystems, through a single interface by integrating the digital entertainment functionality of Media Center with whole-house automation and control. Led by software industry professionals with extensive experience with distributed computing based on open standards and open architecture, Exceptional Innovation combines Microsoft development expertise with years of home control experience to deliver simple, seamless, life-enhancing solutions for the digital home.
